Mumbai, India | adnanrampurawala99@gmail.com | 7738189128 | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Final-year IT student with hands-on experience in AI/ML, generative AI, and full-stack SaaS development. Built and shipped AI-powered products, completed two applied AI internships, and currently build CRM/automation systems for a startup client. Strong foundation in Python, TypeScript, and AI platforms (IBM, Oracle, Google).

EDUCATION

KJ Somaiya Institute of Technology (KJSIT), Mumbai <i>Bachelor of Technology, Information Technology — CGPA: 8.65 / 10 (Semesters 1–6)</i>	2023 – 2027
Kishinchand Chellaram (K.C.) College, Mumbai <i>HSC (11th–12th) — 62.83%</i>	2021–2023
Saifee High School, Mumbai <i>SSC — 80%</i>	Completed May 2021

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java
Frameworks & Platforms: Next.js, React, Spring Boot, TailwindCSS, Shadcn UI, Supabase
AI/ML: Groq API, Grok API, NLP, machine learning model integration, agentic AI systems, OCR, prompt engineering
Tools & Other: Git, REST APIs, MCP, GST automation, WhatsApp Business integration, agentic coding tools (Antigravity, Continue)

EXPERIENCE

Developer — AdScale Agency (Startup Client) - Built a CRM for lead management, including an automated lead-generation pipeline and a Kanban board for tracking leads through the pipeline. - Implemented WhatsApp and email outreach automation, integrating MCP for email workflows.	Jan 2026 – Sept 2026
Gen AI Intern — Claidroid Technologies Pvt Ltd - Designed and developed a trend analysis bot to identify, analyze, and summarize emerging trends from real-time data sources. - Built a data collection pipeline to gather and preprocess structured and unstructured data for downstream analysis. - Applied ML and NLP techniques to extract insights, detect patterns, and generate automated summaries; implemented agentic decision-making logic to improve trend-detection accuracy. - Worked with Python, REST APIs, and the Grok API for AI model integration in a collaborative, agile team environment.	Dec 2025 – Jan 2026
AI Intern — Edunet Foundation (in association with IBM SkillsBuild) - Completed a virtual, project-based internship covering practical AI/ML concepts through curated learning paths and hands-on projects. - Delivered a final project with a formal presentation under the guidance of industry mentors, alongside technical sessions and masterclasses.	Jun 2025 – Jul 2025

PROJECTS

Startup Sphere — AI Powered SaaS Platform for SMBs - Built a production-ready full-stack platform (Next.js App Router, Supabase, TypeScript, TailwindCSS, Shadcn UI, Groq AI) with WhatsApp invoicing, AI shelf-photo-to-inventory import, bill OCR, multilingual voice input, GST automation, and AI social media content generation. - Includes Reelify (AI reel strategy generator) and Leadchain (automated lead-generation pipeline) as integrated modules, plus a three-tier permission system (Admin → Owner → Employee).
Smart Traffic Management System — Research Project - Developing a Mumbai-focused vehicle detection and traffic management system; completed the full software/frontend build. - Working on model accuracy improvements and preparing findings for submission as a research paper.
ProdHealth — AI Food Analysis Platform - Built a platform that decodes packaged-food ingredient lists via the Open Food Facts database plus a custom enrichment layer, flagging harmful or unhealthy additives in plain language. - Designing an ML model to generate personalized health ratings based on nutrition, ingredient quality, and individual dietary restrictions.
NGO Nexus — NGO & Volunteer Engagement Platform Built a web platform (HTML, CSS, JavaScript, Spring Boot) connecting NGOs with volunteers, supporting NGO registration, event creation, and participation tracking.

CERTIFICATIONS

• Business Intelligence and Analytics — NPTEL • Oracle Cloud Infrastructure (OCI) AI Foundations Associate — Oracle • Artificial Intelligence Fundamentals — IBM • Python for Data Science — IBM
